VIDEOMANAGER EX ON-PREMISES DEVICE LICENSE OFFERINGS

MOTOROLA SOLUTIONS

CAMERA LICENSE

This license is required in order to use your VB-series camera with VideoManager EX. It also enables the following functionality:

FEATURES	
5 YEARS OF SOFTWARE ASSURANCE	Phone support, email support, and access to new VideoManager EX releases within the 5 year period.
BODY-WORN CAMERA MANAGEMENT	Administer your suite of body-worn cameras from VideoManager EX. This includes assigning devices to ensure that all recorded footage can be traced back to a specific user, and upgrading devices to the most recent firmware. Customise a wide range of recording behaviour including recording alerts, video resolution and GPS.
USER MANAGEMENT	Manage and streamline your workers' access to VideoManager EX using granular permissions, groups, and roles. Meet your organization's security policies with comprehensive password policies, automatic account locking after incorrect password entries and two-factor authentication.
INCIDENTS	Group footage from body-worn cameras, in-car video systems and other imported media into evidence bundles. Enables you to clip and redact videos in line with evidentiary requirements, and then share or export.
MEDIA IMPORT	This enables **one user per device licence** to import external media - including PDF, MP4, JPG, and PNG - into VideoManager EX. You can then process, redact, and handle this media in the same manner as body-worn or in-car video.
MEDIA PROPERTIES	Meet your organization's media categorisation requirements with VideoManager EX's powerful custom fields (including dropdowns, checkboxes, and date/time fields).
STREAMING	Stream live footage from your body-worn cameras back to VideoManager EX, over WiFi.
ONSTREAM	Use VideoManager EX to serve live-streams and recordings from your body-worn cameras back to an ONVIF-compatible Video Management System (VMS). This enables you to view - and record - footage in a third-party VMS.
REPORTS	Collate information about high-level system parameters - such as user behaviour, camera field trips and equipment availability - into one downloadable CSV file.
USER INTERFACE CUSTOMISATION	Integrate VideoManager EX into your organization's brand identity with a configurable colour scheme, logo and default language.
VB SMARTCONTROL APP	Watch and categorize VB400 footage securely while still in the field using the VB SmartControl Android or iOS app. Once your VB400 is redocked, all footage is automatically offloaded to VideoManager EX.

HQ BASE

This license enables more powerful VideoManager EX features, in addition to the functionality provided by your VB-series camera license.

FEATURES	
CENTRAL VIDEOMANAGER EX	Enables hierarchical architecture with oversight over multiple installations: one instance of VideoManager EX acts as a Central VideoManager EX (which controls licensing, configuration and metadata) while other instances connect to it as sites.
STREAMING SERVER EXPORT	Use your body-worn cameras to simultaneously stream footage to a cloud VideoManager EX instance and download footage to an on-premises VideoManager EX instance.
IDENTITY MANAGEMENT	Export a VideoManager EX user list with one click, then easily modify and re-import, or quickly migrate to another instance.
USER IMPORT TOOL	Automatically sync your existing user database with VideoManager EX to easily manage joiners and leavers and ensure up-to-date user permissions. Compatible with multiple sources, including Azure AD™.
COMPOSITE CLIPS	Compile multiple, parallel viewpoints of an event into one video within an incident, then watch the clips back simultaneously.
ANTIVIRUS INTEGRATION	Scan imported media for viruses in conjunction with a customer-provided OPSWAT™ service.
MEDIA PREPARATIONS	Redact and annotate media without adding it to an incident. This includes blurring, pixelation, zooming, transcribing and cropping.

ADDITIONAL LICENSES

These licenses ensure that your additional requirements are fully met.

PART CODE	DESCRIPTION
VM-EPL-STORE-1TB	Use VideoManager EX with customer-provided Amazon S3™ or Microsoft Azure Blob™ storage. Required for each TB of storage.
VM-EPL-3PVMS	Enables VideoManager EX integration with third-party VMSs. Required for every site which will be passing streams to a third-party VMS. Not required for integration with ONVIF-compliant VMSs.

MOTOROLA *SOLUTIONS*

SOFTWARE ASSURANCE

By default, every VideoManager EX license comes with 12 months of Software Assurance - this grants you access to phone/email support and VideoManager EX releases within that period. You can also add extra Software Assurance to your license, to ensure your organization always has the most up-to-date software with the newest features.

PART CODE	DESCRIPTION
VM-ESA-VB-12/24M-1	Extra 12 or 24 months of Software Assurance for a VideoManager EX installation with a **camera** license.
VM-ESA-HQ-BASE-12/24M	Extra 12 or 24 months of Software Assurance for a VideoManager EX installation with a **HQ BASE** license.
VM-ESA-STORE-1TB-12/24M	Extra 12 or 24 months of Software Assurance for a VideoManager EX installation with a **VM-EPL-STORE-1TB** license.
VM-ESA-3PVMS-12/24M	Extra 12 or 24 months of Software Assurance for a VideoManager EX installation with a **VM-EPL-3PVMS** license.
